

AI – The Future Today

Third International Forum

2 June 2026

Cosmos St.Petersburg

Pribaltiyskaya Hotel

Third International Forum “AI — The Future Today”

01

An effective platform for comprehensive interaction between AI solutions developers and consumers in various sectors of the economy

02

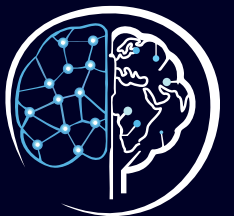

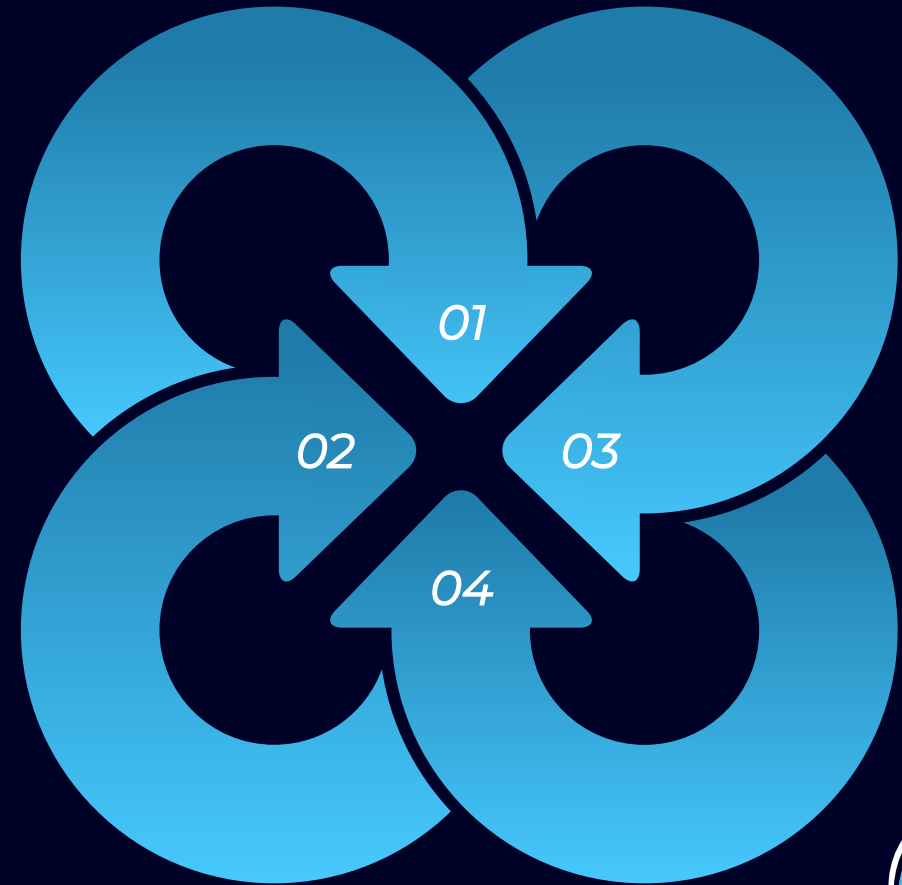

The event where **business and government representatives** at the federal and regional levels meet for a complex discussion of the key directions of the artificial intelligence development

03

The next stage of **systematic work** with reliable results of artificial intelligence implementation in various sectors of the economy

04

A platform for **structuring** further steps in the evolution of artificial intelligence

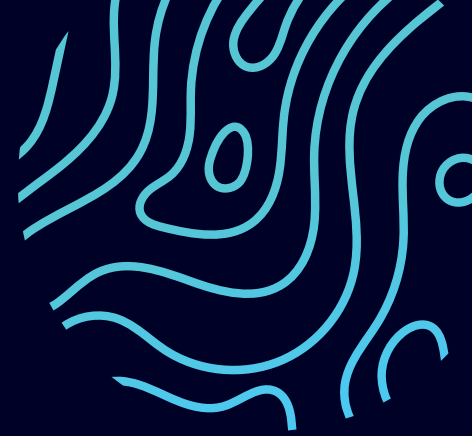

The strategic goal of the Forum

*To form a global forecast for the artificial intelligence development
and promoting targeted, broad-based industrial application
of artificial intelligence technologies*

Forum tasks

- ✓ *Creation of a multifunctional expert platform for the development of artificial intelligence*
- ✓ *Support for generative artificial intelligence developments and their widespread implementation*
- ✓ *Investment attraction to the industry*
- ✓ *Workout of recommendations for the professional community and the bodies of public authorities on the development of artificial intelligence*

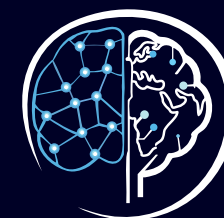

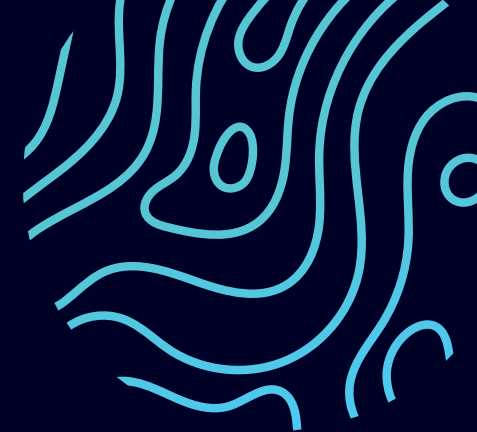

“

<...> Artificial intelligence, along with digital platforms and autonomous systems, is shaping an entirely new landscape for the economy, public relations, the social sphere, education, healthcare, logistics and industry, as well as defence and security – in essence, for the life of the nation as a whole. <...>

*Vladimir Putin,
President of the Russian
Federation (Meeting on
the development of
artificial intelligence
technologies, April 10,
2026)*

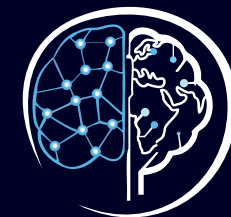

“

<...> The "AI – The Future Today" forum was a success the previous two years, and we are confident that this year it will once again become an important platform for discussing practical solutions and strengthening Russia's position on the global technology agenda. <...> Today, artificial intelligence is becoming a key driver of economic growth and technological sovereignty. The implementation of AI solutions in industry, management, and the social sphere is not just a trend, but a necessity for maintaining the competitiveness of regions in particular and the country as a whole. <...>

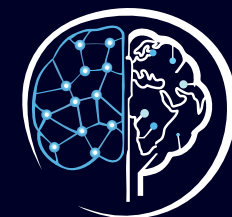

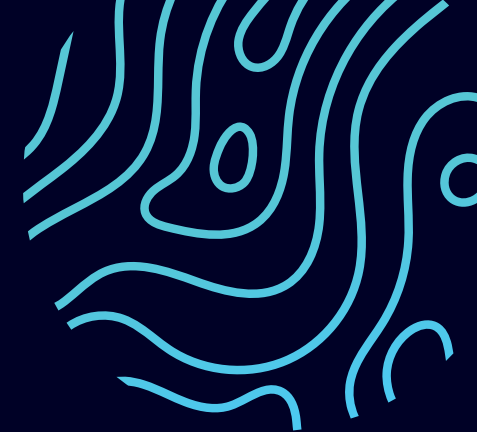

*Alexander Stuglev,
Chairman of the Board,
Chief Executive Officer,
The Roscongress
Foundation (from
greetings to the
participants and
guests of The "AI – The
Future Today" Forum)*

“ AI is not only a tool for increasing efficiency but also the key to create a new quality. It impacts all areas of life, each with its own application. Either you participate in the competitive struggle for leadership, or your country will remain on the sidelines of the New Technological Order, if it doesn't adapt to these realities.

*Valentin Makarov,
President, RUSOFT
Association*

Benefits of the Forum

The practical nature of the event

Topical issues

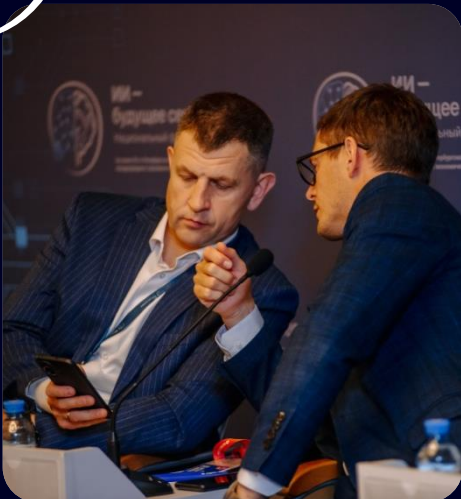

The highest level of competence of the speakers and participants

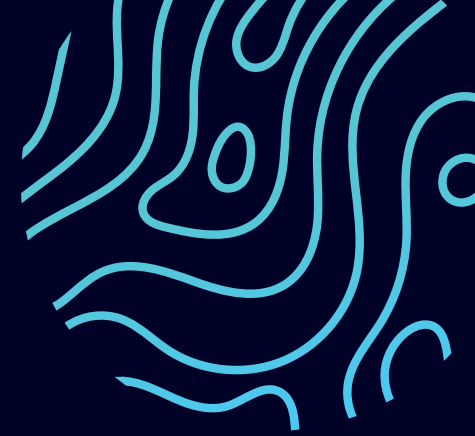

Effective formats for work, communications, and promotion:

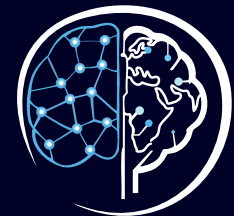

- ✓ *B2B meetings*
- ✓ *20 hours of business program*
- ✓ *12 thematic streams*
- ✓ *Presentation of AI achievements*
- ✓ *VIP reception*
